Art Unit: 3724

#### **DETAILED ACTION**

## Claim Rejections - 35 USC § 103

- 1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
  - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 2. Claims 1 and 5-7 are rejected under 35 U.S.C. 103(a) as being unpatentable over Altman (US 4,453,458) in view of Bringham (US 561,860).

Altman discloses the invention substantially as claimed including a shaft (at 54, Figure 5), a first phase cutter (at 94), a second phase cutter comprising first and second oval blades (at 54) wherein the first oval blade coplanar with the second oval blade (Figures 4-5). It is noted that a sharpened edge is an inherent characteristic of a coring knife. Altman fails to disclose the first phase cutter comprising a flat blade having a thin center tapering to a thicker first end and a thicker second end, and having the thin center protrude further distally than the first and second ends. Bringham discloses a knife having a flat blade having a thin center (V shaped edge) tapering to a thicker first end and a thicker second end (at b), and having the thin center protrude further distally than the first and second ends (Figure 1). It would have been obvious to one having ordinary skill in the art at the time the invention was made to modify the first phase cutter of Altman to provide a flat blade having a thin center tapering to a thicker first end and a thicker second end, and having the thin center protrude further distally than the first and second ends as taught by Bringham in order to facilitate penetration of a cutter

into the workpiece. Regarding claims 6-7, the modified coring tool of Altman can be employed with a hand held powered stirrer, for example, as is in Mattar.

## Response to Arguments

3. Applicant's arguments with respect to claims 1 and 5-7 have been considered but are most in view of the new ground(s) of rejection.

#### Conclusion

- 4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Console et al., Ewald, and Simpson et al. are cited to show related devices.
- 5. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
